

replace it with -- claim 1 --.

Claim 7, line 1, delete "anyone of the claims 1 to 6" and replace it with -- claim 1 --.

Add the following new claims:

B2  
~~3~~ 3. Container according to claim 2 characterised in that the bottom element (11) has attachment openings (39-44) for supporting pillars for transversal partition walls for the partitioning of the container into four sections.

~~4~~ 4. Container according to claim 2 characterised in that each partition wall comprises two support pillars (16, 17) and a wall element (36) which can be attached to these.

~~8~~ 8. Container according to claim ~~7~~ 7 characterised in that each partition wall comprises two support pillars (16, 17) and a wall element (36) which can be attached to these.

~~5~~ 5. Container according to claim 2 characterised in that the total collapsed height of the container is one quarter of its height as erected.

~~9~~ 9. Container according to claim ~~7~~ 7 characterised in that the total collapsed height of the container is one quarter of its height as erected.

~~12~~ 12. Container according to claim ~~11~~ 11 characterised in that the total collapsed height of the container is one quarter of its height as erected.

~~6~~ 6. Container according to claim 2 characterised in that the gable walls are disengagably attached to the bottom

element in such a way that the weight can be transferred to the gable walls.

~~10~~<sup>10</sup>16. Container according to claim ~~3~~<sup>31</sup> characterised in that the gable walls are disengagably attached to the bottom element in such a way that the weight can be transferred to the gable walls.

~~13~~<sup>13</sup>17. Container according to claim ~~4~~<sup>11</sup> characterised in that the gable walls are disengagably attached to the bottom element in such a way that the weight can be transferred to the gable walls.

~~17~~<sup>17</sup>18. Container according to claim ~~5~~<sup>14</sup> characterised in that the gable walls are disengagably attached to the bottom element in such a way that the weight can be transferred to the gable walls.

~~16~~<sup>16</sup>19. Container according to claim ~~6~~<sup>15</sup> characterised in that the gable walls are disengagably attached to the bottom element in such a way that the weight can be transferred to the gable walls.

#### REMARKS

By the above amendment, applicant has rewritten the multiple dependent claims in single dependent form. In addition, claim 4 was amended to remove an occurrence of the phrase "consists of" and replace it with the term "comprises." The specification was also amended to add a brief description
